through an engagement with the philosophies of proust s contemporaries félix ravaissou henri bergson and georg simmel suzanne guerlac presents an

original reading of remembrance of things past a la recherche du temps perdu challenging traditional interpretations she argues that proust s magnum opus is not a melancholic text but one that records the dynamic time of change and the complex vitality of the real situating proust s novel within a modernism of money and broadening the exploration through references to cultural events and visual technologies commercial photography photojournalism pornography the regulation of prostitution the panama scandal and the dreyfus affair this study reveals that proust s subject is not the esthetic recuperation of loss but rather the adventure of living in time on both the individual and the social level at a concrete historical moment

as climate change becomes an increasingly important part of public discourse the relationship between time in nature and history is changing nature can no longer be considered a slow and immobile background to human history and the future can no longer be viewed as open and detached from the past times of history times of nature engages with this historical shift in temporal sensibilities through a combination of detailed case studies and synthesizing efforts focusing on the history of knowledge media theory and environmental humanities this volume explores the rich and nuanced notions of time and temporality that have emerged in response to climate change

responsible manufacturing has become an obligation to the environment and to society itself enforced primarily by customer perspective and governmental regulations on environmental issues this is mainly driven by the escalating deterioration of the environment such as diminishing raw material resources overflowing waste sites and increasing levels of pollution responsible manufacturing related issues have found a large following in industry and academia which aim to find solutions to the problems that arise in this newly emerged research area problems are widespread including the ones related to the lifecycle of products disassembly material recovery remanufacturing and pollution prevention organized into sixteen chapters this book provides a foundation for academicians and practitioners and addresses several important issues faced by strategic tactical and operation planners of responsible manufacturing using efficient models in a variety of decision making situations it provides easy to use mathematical and or simulation modeling based solution methodologies for the majority of the issues features addresses a variety of state of the art issues in responsible manufacturing highlights how popular industrial engineering and operations research techniques can be effectively exploited to find the most effective solutions to problems presents how a specific issue can be approached or modeled in a given decision making situation covers strategic tactical and operational systems issues provides a foundation for academicians and practitioners interested in building bodies of knowledge in this new and fast growing area

heritage ecologies presents an ecological understanding of heritage that furthers a concern for how its making and unmaking always involves a wide range of human and other than human actors recognizing the entangled nature cultures of heritage is essential in the anthropocene era where

uncertainty and rapid environmental change force us to recast common conceptions of inheritance and to envision new strategies for preservation heritage sites are meant to be open and shared spaces and a recurring argument in the cases presented here is that this openness inevitably also overrides our selections orders and appreciations through a diverse range of case studies the chapters collected in this book aim to explore the affects and memories engendered by diverse heritage ecologies where humans are neither the sole makers nor the only inheritors the common call is that the experiential perceptive and informational plenitude enabled through contributions of other than human actors is key to an ecological rethinking of heritage in the twenty first century heritage ecologies is unique in bringing heritage studies into closer proximity with a wide variety of non representational and object oriented theories and is an important volume for students and researchers in archaeology and heritage studies
