this book provides plant managers supervisors safety professionals and industrial hygienists with recommended procedures and guidance for safe entry into confined spaces it reviews selected case histories of confined space accidents including multiple fatalities and discusses how a confined space entry program could have prevented them it outlines the requirements of the osha permit entry confined space standard and provides detailed explanations of requirements for lockout tagout air sampling ventilation emergency planning and employee training the book is filled with more than 100 line drawings and more than 150 photographs

this book records the presentations given at a workshop held in bonn in may 1994 the aim of the meeting was to bring together scientists from various disciplines and clinicians to discuss within a group of experts the theoretical medical engineering and regulatory aspects of automated control of therapeutic interventions in anaesthesiology the meeting was considered a continuation of a preceding work shop on quantitation modelling and control in anaesthesia 1 which was held also in bonn 10 years ago in may 1984 that workshop dealt with problems of how to quantitate concepts like anaesthetic depth how to model anaesthetic drug disposition how to link pharmacokinetics and pharmacodynamics and how to use such concepts for the control of anaesthetic drug delivery with respect to these topics the current proceedings have simultaneously both a broadened and a narrowed perspective it is broadened in so far as the topics of the workshop did not focus exclusively on anaesthetic drugs and the control of their delivery but did also discuss anaesthesia machine monitoring and patients therapeutic monitoring as well as control of blood pressure and artificial ventilation the proceedings have narrowed the perspective insofar as they do not intensively discuss the processes of quantitation and modelling but presuppose them and give more room to control especially automated control during the past 10 years informatics has tremendously expanded its knowledge and methods applicable to control problems

examines vital topics in pre anesthesia assessment pre operative problems resuscitation specialty anesthesia post operative management and more its unique algorithmic approach helps you find the information you need quickly and gives you insights into the problem solving techniques of experienced anesthesiologists
