the eloquence of effort second edition glorifies the dignity of human effort against the tedium of work it offers a counterpoint a lyrical view of work as a sacred force delving into the inherent value of purposeful effort it dismisses euphemisms like work life balance and quality time as rationalizations for eschewing purposeful activities in modern life labor is often dismissed as a relic of obligation indeed through the lens of history religion and philosophy the writer reveals how effort has sculpted empires defined humanity and provided the scaffolding of civilization from the benedictines creed where work is worship to the karmic echoes of dharma the writer reframes labor not as punishment but a reason to embrace effort as the heartbeat of prosperity extending beyond metaphorical language the writer cites the underlying principles of the second law of thermodynamics as such a tidy kitchen devolves into a messy one unless human hands intervene this drift toward disorder is entropy the whisper of impermanence in every system the shadow behind structure the pulse of transformation whether mapped through thermodynamics or karmic unraveling entropy reminds us that without sustained effort things fall apart

essentially work must be embraced as the antidote to chaos whereas entropy promotes decay only meaningful effort counteracts its insidious effects entropic law like karmic law is inflexible and does not adapt to personal circumstances drawing parallels between these natural laws the writer illuminates the treacherous nature of entropy embracing sophocles timeless wisdom without labor nothing prospers the writer believes that steadfast effort is never in vain further just as work demands effort effort demands work the resonant message being that life's true fulfillment resides in meaningful effort whether one views time as a finite resource or wishes to make a lasting imprint the eloquence of effort is a beacon of wisdom for those choosing purpose over pleasure

in a world of supercomputers genetic engineering and fiber optics technological creativity is ever more the key to economic success but why are some nations more creative than others and why do some highly innovative societies such as ancient china or britain in the industrial revolution pass into stagnation beginning with a fascinating concise history of technological progress mokyr sets the background for his analysis by tracing the major inventions and innovations that have transformed society since ancient greece and rome what emerges from this survey is often surprising the classical world for instance was largely barren of new technology the relatively backward society of medieval europe bristled with inventions and the period between the reformation and the industrial revolution was one of slow and unspectacular progress in technology despite the tumultuous developments associated with the voyages of discovery and the scientific revolution what were the causes of technological creativity mokyr distinguishes between the relationship of inventors and their physical environment which determined their willingness to challenge nature and the social environment which determined the openness to new ideas he discusses a long list of such factors showing how they interact to help or hinder a nation's creativity and then illustrates them by a number of detailed comparative studies examining the differences between europe and china between classical antiquity and medieval europe and between britain and the rest of europe during the industrial revolution he examines such aspects as the role of the state the chinese gave up a millennium wide lead in shipping to the europeans for example when an emperor banned large ocean going vessels the impact of science as well as religion politics and even nutrition he questions the importance of such commonly cited factors as the spill over benefits of war the abundance of natural resources life expectancy and labor costs today an ever greater number of industrial economies are competing in the global market locked in a struggle that revolves around technological ingenuity the lever of riches with its keen analysis derived from a sweeping survey of creativity throughout history offers telling insights into the question of how western economies can maintain and developing nations can unlock their creative potential

harrowing in their frank detail and desperate tone the selections in this anthology pack an emotional wallop should be required reading for anyone concerned about the violence in our society and the high rate of recidivism publishers weekly includes work by jack london nelson algren chester himes jack henry abbott robert lowell malcolm x mumia abu jamal and piri thomas
