the field of oncology benefits from several large scale reference books and a host of monographs dedicated to specific cancers however truly excellent practice and review books are surprisingly quite scarce outside of a scant handful of books and online reference tools that offer clinical response practice and board review in a basic question

and answer format there are no resources that offer a robust engaging fully referenced tool for these vital activities in every oncologist's and oncology trainee's work. This print and electronic book seeks to fill that void offering comprehensive question and answer style content that covers the entire specialty of oncology and provides practicing oncologists with a fascinating and immediately applicable compendium of vital information dealing with a well balanced selection of common and uncommon cancers. At the heart of this book is the editor's and authors' desire to overcome the controversies and barriers to practice that usually emerge following the appearance of new data. In every section the user is guided toward collaboration in ongoing clinical research for example via discussions of well designed ongoing clinical trials in each specific area developed with both the teacher and learner in mind. This book also offers trainees and fellows an excellent opportunity to enhance their preparation for the ABIM oncology fellowship exam as well as for the oncology boards. It will also be an extremely useful tool for oncologists working toward the recertification exam. This comprehensive beefy book includes hundreds of painstakingly developed multiple choice and mini case based questions covering the principles of medical oncology, malignant hematology, surgical oncology and radiation oncology. It also contains mini cases and questions dealing with the biology, diagnosis, classification, staging and multidisciplinary treatment of cancers at every anatomic site. The very latest topics are included such as molecular techniques, targeted therapies and translational cancer research. Concise but detailed answers are referenced to key journals and books and evidence based wherever possible. NCCN guidelines are also referenced as appropriate. With its powerful focus on take home messages from and for actual clinical work, this book will help keep oncologists up to date bridging the gaps between journal and reference literature, conferences and their existing knowledge base.
